Hey [REDACTED] call me or text back when you get this. I've 2 sites on generation in the town of Pulga that is feeding an overhead system of secondary. My issue is that if we have to D energize that or are planning to D energize that I will need to have the electrician go up there and standby.

Did you ever get any mapping for the fire, I don't see any come through on the email

3:16 PM

I sent it to the North Valley OEC group? Thought you'd be on it...I'll forward that map now that's old from 0500 this AM. I'll push out another map around 5 PM

3:16 PM

Ok
